

3. SWITCHED ACCESS

3.1 GENERAL

Switched Access Service provides for the switching and routing of interexchange telecommunications traffic to or from the called party's premises, either directly or via contractual or other arrangements with an affiliated or unaffiliated entity, regardless of the specific functions provided or facilities used.

(C)

3. SWITCHED ACCESS

3.3 SWITCHED ACCESS RATE CATEGORIES (Cont'd)

3.3.1. CARRIER COMMON LINE

The Carrier Common Line rate category provides Customers with the use of services, facilities, and/or equipment owned, or controlled through contractual or other arrangements, by the Company, in order to access End Users to furnish interstate communications.

(C)

(C)

No Carrier Common Line charge is assessed in this Tariff.

(N)

(D)

(D)

3. SWITCHED ACCESS

3.3 SWITCHED ACCESS RATE CATEGORIES (Cont'd)

3.3.2. TANDEM TRANSPORT

(T)

The Tandem Transport rate category provides for the transmission between an access tandem and the Company's End Office, Trunk Gateway or functionally equivalent location. Rate elements include:

(T)
(C)
(C)

(D)

(D)

A. Transport Termination

(T)

The Transport Termination element includes the non-distance sensitive portion of Tandem Transport and is assessed on a per-access-minute-of-use basis.

B. Transport Mileage

(T)

The Transport Mileage element includes the distance sensitive portion of Tandem Transport and is assessed on a per-access-minute-of-use-per-mile basis. Transport mileage will be calculated based on the airline mileage between the access tandem (or functional equivalent) and the Company's End Office, Trunk Gateway or functionally equivalent location within the applicable LATA.

3.3.3. NETWORK ACCESS

(T)

(D)

(D)

Network Access provides the functional equivalent of traditional end office switching. It consists of the following elements: Network Switching and Common Trunk Port.

(C)

(C)

(D)

A. Network Switching

(T)

Network Switching provides for: (a) the establishment of a call path for the routing of Customer communications from the Company's End Office, Trunk Gateway, or functionally equivalent location to a Company End User and (b) the establishment of a call path for the routing of communications originating from a Company End User for delivery to the Company's End Office, Trunk Gateway, or functionally equivalent location.

(C)

The "establishment" of call path and routing is achieved through equipment and facilities, including, in some cases, a soft switch or similar equipment, owned, or controlled through contractual or other arrangements, by the Company, which allows for the routing of voice communications between the Company's End Office, Trunk Gateway, or functionally equivalent location and End Users via SS7 signaling based on telephone numbers obtained by the Company and assigned to End Users as set forth in the LERG.

(C)

B. Common Trunk Port

Provides for the termination of tandem transport trunks in shared ports at the Company's End Office, Trunk Gateway, or functionally equivalent location. The Common Trunk Port rate is assessed on a per-MOU basis to all trunkside originating and terminating access minutes routed to the Company via a third-party access tandem.

(C)

(C)

(D)

(D)

3. SWITCHED ACCESS

3.3 SWITCHED ACCESS RATE CATEGORIES (Cont'd)

3.3.4. 8XX TOLL-FREE ACCESS SERVICE

All appropriate Switched Access rate elements apply to 8XX Toll-Free Access Service.

8XX Toll-Free Access Service is an originating access service offering. The service provides for the forwarding of End User originated 8XX calls to a Company Service Control Point, which will initiate a query to the database for the identification and delivery of the call. The call is forwarded to the appropriate customer based on the dialed 8XX number.

(C)
(T)
|
(T)
(D)

1. Customer Identification Charge

The 8XX Toll-Free Access Service Customer Identification Charge applies for the identification of and delivery of 8XX calls to the appropriate customer. The charge is assessed to the Customer on a per query basis.

3.5.3 MEASURING ACCESS MINUTES

Customer traffic will be measured in minutes of use by the Company at its End Office, (C)
Trunk Gateway, or functionally equivalent locations. Originating and terminating calls (C)
will be measured (i.e., recorded or assumed) by the Company to determine the basis for
computing chargeable access minutes. Access minutes or fractions thereof are (C)
accumulated over the billing period and are then rounded up to the nearest access minute. (C)

(D)

(D)

3. SWITCHED ACCESS

3.5 RATE REGULATIONS (Cont'd)

3.5.4. RATES BASED UPON DISTANCE

Where the charges for service are specified based upon distance, the following rules apply:

- A. Distance between two points is measured as airline distance. In the case of distance measurement for tandem transport, the two points are the access tandem and the Company's End Office, Trunk Gateway, or other functionally equivalent location. Their measurement points are a set of geographic "V" (vertical) and "H" (horizontal) coordinates. (C)
- B. The airline distance between any two points is determined as follows: (T)
 - 1. Obtain the "V" and "H" coordinates for each point. (C)
 - 2. Compute the difference between the "V" coordinates of the two points; and the difference between the two "H" coordinates. (T)
 - 3. Square each difference obtained in step (2) above.
 - 4. Add the square of the "V" difference and the square of the "H" difference obtained in step (3).
 - 5. Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
 - 6. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

3. SWITCHED ACCESS

3.5 RATE REGULATIONS (Cont'd)

3.5.5 ALLOWANCE FOR INTERRUPTIONS IN SERVICE

(T)

A. General

1. A service is interrupted when it becomes inoperative to the Customer, e.g., the Customer is unable to transmit or receive, because of a failure of a component furnished by the Company under this Tariff.
2. An interruption period begins when the Customer reports a service, facility or circuit to be inoperative and, if necessary, releases it for testing and repair. An interruption period ends when the service, facility or circuit is operative.
3. If the Customer reports a service, facility or circuit to be interrupted but declines to release it for testing and repair, the service, facility or circuit is considered to be impaired but not interrupted. No credit allowances will be made for a service, facility or circuit considered by the Company to be impaired.

3. SWITCHED ACCESS

3.5 RATE REGULATIONS

3.5.5 ALLOWANCE FOR INTERRUPTIONS IN SERVICE (Cont'd)

B. Limitations on Allowances

1. No credit allowance will be made for any interruption in service:
 - a. Due to the negligence of or noncompliance with the provisions of this Tariff by any person or entity other than the Company, including but not limited to the Customer or third parties connected to the service of the Company;
 - b. Due to the failure of power, equipment, systems, connections or services not provided by the Company;
 - c. Due to circumstances or causes beyond the control of the Company;
 - d. During any period in which the Company is not given full and free access to its facilities and equipment for the purposes of investigating and correcting interruptions;
 - e. During any period in which the Customer continues to use the service on an impaired basis;
 - f. During any period when the Customer has released service to the Company for maintenance purposes or for implementation of a customer order for a change in service arrangements;
 - g. That occurs or continues due to the Customer's failure to authorize replacement of any element of special construction; and
 - h. That was not reported to the Company within thirty (30) days of the date that service was affected.

2. Use of Another Means of Communications

If the Customer elects to use another means of communications during the period of interruption, the Customer must pay the charges for the alternative service used.
