6.2 SWITCHED ACCESS

VoIP-PSTN traffic is defined as traffic that originates and/or terminates in Internet Protocol (IP) format. VoIP-PSTN traffic is required to be compensated at interstate access rates by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) unless the Company and the customer have agreed otherwise.

(N)

The Company affirms that all of its Maryland traffic either originates from or terminates to a VoIP end user and is, therefore, VoIP-PSTN traffic.

VoIP-PSTN traffic will be billed at rates equal to the Company's applicable tariffed interstate switched access rates as specified in its Tariff FCC No. 1.
