The services set forth in this Section are optional in nature and are available on an individual basis or as part of multiple feature packages. Miscellaneous Services are provided upon subscription request or, in some cases, are prearranged and activated by the customer's election to use the service. Services are provided subject to system and facility availability and may not be available with all classes of service.

7.1. CUSTOM CALLING FEATURES

Optional Custom Calling features are available with the Company's Local Service. Customers may order features individually or as part of a feature package. Monthly recurring charges associated with features are applied per access line, and are in addition to any other applicable charges. Usage charges may also apply to some features.

(C)

7.1.1. OPTIONAL FEATURES

Customers may order any one or more of the following optional features for a monthly charge as specified in Section 7.1.3.

This feature allows the customer to reject calls from callers who have blocked identification of their telephone number to Caller ID display devices. Anonymous Call Rejection may be activated and deactivated by dialing a specified code.

B. Call Forwarding Remote Access

Allows a customer to activate or deactivate Call Forwarding Selective or Call Forwarding Variable from a line other than their base station line. The customer uses a Personal Identification Number (PIN) to access Call Forwarding with Remote Access.

C. Call Forwarding Selective

This feature enables customers to program their telephone to forward calls from a selected list of telephone numbers to another telephone number. The customer assumes financial responsibility for all calling charges generated by the use of this feature.

7.1. CUSTOM CALLING FEATURES (CONT'D)

7.1.1. OPTIONAL FEATURES (CONT'D)

E. Call Return

This feature allows a customer to recall the last incoming call by dialing a preset code. If the called number is busy, automatic processing of the call continues for up to 30 minutes until both lines are idle unless the customer dials the deactivation code. Calls returned outside the local calling area are subject to toll charges. This feature is available on a monthly subscription or a pay-per-use basis. Customers who choose the pay-per-use option are billed per activation, regardless of whether or not the attempted call is completed.

F. Call Return Blocking

This feature blocks the customer's capability to use the Call Return pay-per-use feature.

G. Call Screening

This feature permits customers to designate up to 12 telephone numbers from which incoming calls will be automatically completed to a prerecorded announcement circuit which will indicate that calls are not being taken at that time.

H. Call Trace

Call Trace allows the customer to initiate an automatic trace of the last call received. After receiving a call that is to be traced, the customer dials a code and the traced number is automatically sent to the Company. The customer will not receive the telephone number of the party who called. The Company will hold the traced telephone number for release to the appropriate law enforcement personnel. The customer will be assessed a charge per successful trace.

I. Call Waiting

The Call Waiting feature enables a customer already on a call to be notified of another call by the sound of a Call Waiting tone. The customer may place the existing call on hold and answer the new call. The Call Waiting feature may be canceled by dialing a preset code.

7.1.1. OPTIONAL FEATURES (CONT'D)

J. Caller ID

Caller ID allows the customer to identify the telephone name and number from which a call is being made. The name and telephone number of the person initiating the call is displayed on a customer-provided display device.

K. Caller ID Blocking Per Line [1]

This feature blocks the display of the customer's name and telephone number to Caller ID display devices on all calls made from the subscribed line. This feature may be de-activated at any time by the customer on a call-by-call basis through the activation of a special code. This feature is provided at no monthly charge to the customer. Per Line Blocking will not prevent the display of originating telephone numbers to 911 emergency service providers.

L. Caller ID Blocking Per Call

This feature allows customers to block the display of their name and telephone number to the station they are calling on a per-call basis. This feature may be utilized at any time through the activation of a special code prior to dialing an outgoing call. This feature is provided at no monthly charge to the customer. Caller ID Blocking Per Call will not prevent the display of originating telephone numbers to 911 emergency service providers.

M. Caller ID with Call Waiting

This feature allows a subscriber who is off-hook on an existing call to receive caller identification information on a new incoming call. To utilize this feature the customer must have a special Call Waiting/Caller ID unit that accommodates both functions. Customers subscribing to Caller ID and to Call Waiting may receive the Caller ID Call Waiting feature at no additional charge.

- [1] The initial request for line blocking will be provided free of charge for all new and existing customers upon request to the Company's business office. However, if a customer subscribes, disconnects, and then reconnects line blocking at the same address, a nonrecurring service charge will be assessed. The nonrecurring charge will not, under any circumstances, however, be applied to victims of domestic violence receiving services from a domestic violence program or protected by court order, social welfare agencies such as women's shelters, health and counseling centers, public service hotlines and the staff thereof.

P. Hunting

7.9.5. E-9-1-1 TRUNK GROUP FAILURE OR 9-1-1 TANDEM FAILURE

In the event of a failure of all the trunk groups between the Comcast switch(es) and the 9-1-1 tandem, or a failure of the 9-1-1 tandem switch, the following procedure will be followed:

- A. The local 10 digit telephone number of the default 9-1-1 PSAP has been programmed into the Comcast central office switch. In those PSAPs where 10 digit telephone number access to the default 9-1-1 PSAP is not available, the customer must dial 0 to reach the operator platform. In the event of a trunking failure, calls usually routed to the 9-1-1 trunks will be routed to the ten digit telephone number of the default PSAP. If the Comcast personnel via local alarm observe the trunking failure, the alternate routing plan will be invoked along with immediate attempts to isolate and restore the failure. Notification will be made to the local 9-1-1 agency designated notification point. If Comcast is notified of the failure by the 9-1-1 tandem or local 9-1-1 agency, the Comcast operations center will immediately invoke the alternate routing plan and assist as needed to isolate and restore service.
- B. In the event of a failure of all of the trunk groups between Comcast switch(es) and the 9-1-1 tandem, or a failure of the 9-1-1 tandem switch, the Comcast switch is programmed to play the following announcement: "We're sorry, all circuits are busy; will you please try your call again later. Comcast."
