9. MESSAGE TELECOMMUNICATIONS SERVICE

9.1. GENERAL

Message Telecommunications Service (MTS) applies to all toll calls made between two or more rate centers that are furnished or made available by the Company over facilities within the state. MTS provides telecommunication beyond the local serving area. MTS charges cover the service furnished between the calling and called stations.

MTS Service is available to customers located within the Company's service area who subscribe to Comcast Phone Local Service as described in this Tariff.

Charges for MTS calls are determined by the class of the call and the duration of the call. The total amount of the call will be rounded to the nearest cent if the computed rate of the call results in a fractional charge.

Charges for MTS calls apply to all intrastate intraLATA and interLATA calls, all times of day, seven days a week. Usage and service charge rates for interstate and international calls are specified in the Comcast Telecommunications Service Guide located at <http://www.comcast.com/tariffs/>.

9.2. REGULATIONS

9.2.1. DESCRIPTION OF SERVICE

MTS is the furnishing of facilities for telecommunication between station lines in different local service areas in accordance with the terms, conditions, and rates specified in this Tariff. The Company does not undertake to transmit messages but furnishes the use of its facilities to its customers for communications.

Customers subscribing to the Offers specified in Section 5, must be presubscribed to the Company as their IntraLATA and InterLATA toll provider.

Issued: April 25, 2003

Effective: April 25, 2003

9. MESSAGE TELECOMMUNICATIONS SERVICE

9.2. REGULATIONS (CONT'D)

9.2.2. CLASS OF CALLS

Charges apply according to the class of call the calling party selects as defined below.

A. Dial Station

Dial Station charges will apply when the customer dials the desired telephone number without the assistance of a Company Operator and the call is billed to the calling number. This includes calls forwarded by call forwarding equipment.

The Dial Station class of service also applies when the Operator:

1. Records the calling telephone number for areas without automatic recording equipment.
2. Reaches the called telephone number because of trouble on the network or because dial completion is not available.
3. Places a call for a calling party who is identified as being disabled and is unable to dial the call because of that disability.
4. Reestablishes a dialed call when there is a service fault that interrupts a call after the called person has been reached.

B. Operator Services

Operator Services calls may incur either Automated Service Charges or Operator Assisted Service Charges.

An Automated Service Charge applies to any 0+ call that is fully automated through operator systems and does not use a live Company operator.

The Operator Assisted Service Charge applies to all other Operator Services calls. Exceptions are calls in which a Company operator places a call for a calling party who identified himself/herself as being handicapped and unable to dial the call because of a handicap, 0+ calls in which a Company operator is used only to record the calling station number where Originating Number Identification (ONI) is not available, and 0+ calls in which a company operator places a call because Automatic Number Identification (ANI) equipment is not available.

1. Operator Station

Operator Station rates apply when the customer places a call with the assistance of a Company Operator or mechanized response system.

Issued: April 25, 2003

Effective: April 25, 2003

9.2. REGULATIONS

9.2.2. CLASS OF CALLS

B. Operator Services (Cont'd)

2. Collect

Collect rates apply when the customer places a call with the assistance of a Company Operator or mechanized response system and requests to reverse the charges and bill a consenting called customer.

3. Billed to Third Party

Billed to Third Party rates apply when the customer places a call with the assistance of a Company Operator or mechanized response system and requests to bill another customer other than the calling or the called party. This may be done subject to the third party's authorization.

4. Person-to-Person

Person-to-Person charges apply when the calling party specifies to the operator a particular person to be reached, or a particular station, department, or office to be reached through a PBX or Centrex attendant. After the called station has been reached, if the called party is unavailable and the calling party requests or agrees to speak to a party other than the party initially specified, the call is still billed as a Person-to-Person call. The calling party is responsible for identifying the party at the called station.

9.2.3. TIMING OF CALLS

A. On Dial Station and Operator Station calls, the timing of a call begins when the calling and called stations are connected. Calls are timed in one-minute increments.

B. On Person-to-Person calls the timing of a call begins when the calling person is connected to a specified person, station, or an agreed alternate.

C. Chargeable time ends when the connection is terminated at any point.

D. The timing of a call does not include time lost due to service faults or defects that are reported to the Company.

E. MTS usage rates are applied on the basis of whole minute intervals. The billing interval is determined by rounding up partial minutes to the next whole minute.

F. In cases when a message begins in one rate period and ends in another, the price for each minute is the price in effect at the beginning of each minute of usage.
