

## **CUSTOMER OWNED VIDEO EQUIPMENT POLICY<sup>1</sup>**

Comcast offers a variety of video service packages. Many of these packages include equipment. However, you are not required to use Comcast supplied equipment with your video services. Instead, you may choose to use *qualifying equipment* that you own.

**Using your own qualifying equipment may result in your receiving an equipment credit or being charged reduced rates if we are informed of your use of that equipment. The amount of any such discount will be determined by Comcast in its sole discretion.** If you wish to use your own qualifying equipment in lieu of Comcast supplied equipment, you should contact Comcast at 1-800-Xfinity.

“Qualifying equipment” must meet the following requirements:

- (i) it must have been both tested and approved for its intended use by CableLabs®;
- (ii) it must be technically compatible with Comcast’s cable systems and approved for use by Comcast; and
- (iii) it must not be capable of the unauthorized receipt of any services from Comcast.
- (iv) CableCARD compatible devices must have one or more Comcast provided CableCARDS activated.

Equipment also is *not* qualifying if Comcast determines that it was stolen from Comcast or another video service provider, or if for any reason you do not have legal title to the equipment. Equipment which has in any way been tampered with, reverse engineered or otherwise modified without the express written permission of the manufacturer of such equipment also is *not* qualifying and may not be used.

### Applicable Credits

If your CableCARD device or owned video converter qualifies for use on a Comcast cable system, you will be entitled to a Customer Owned Equipment credit. Comcast will begin issuing a monthly Customer Owned Equipment credit to your account.

---
