D. Timing of Calls

1. On Dial Station-to-Station, Customer Dialed Calling Card Station-to-Station and Operator-Handled Station-to-Station, the timing of a call begins when the calling and called stations are connected.
2. On Person-to-Person calls, the timing of a call begins when the calling person is connected to a specified person, station or an agreed upon alternate.
3. Chargeable time ends when the connection is terminated at any point.
4. The timing of a call does not include time lost because of service faults or defects that are reported to the Company.
5. The date, day and time at the calling person's location determines whether the day, evening or night/weekend/holiday rates apply.

 - a. The initial minute is the first minute or any fraction after connection is made.
 - b. The first minute and additional minute MTS rates shown in the rate schedule(s) in Section 4, following, are applied on the basis of whole minute intervals. The billing interval is determined by rounding up partial minutes to the next whole minute.
7. In cases where a basic MTS message begins in one rate period and ends in another, the rate in effect in each rate period applies to the portion of the message occurring within that rate period.
